

Talk Technologies Steno SR Pro : Revolutionary new dictation microphone revealed

The Steno SR dictation microphone lets healthcare, legal and business professionals dictate their documents in complete privacy

SANTA CLARA, CALIFORNIA, UNITED STATES, June 28, 2017 /EINPresswire.com/ -- Talk Technologies the international leader in voice attenuating microphones, recently launched a new Stenomask. The Steno SR [dictation microphone](#) lets healthcare, legal and business professionals dictate their documents in complete privacy saving them time and resources by allowing them to accomplish their core tasks – benefits that can be directly passed on to their clients.

Engineered to replicate the properties of the World's best sound booths means that your transcriptions and recordings are dead accurate and entirely private.

Renowned for its superior microphone quality, the patented SmartMic technology provides a crystal-clear audio recording, and sets the standard for dictation devices worldwide. It guarantees that no background, touch, click, air or structure-borne noise is recorded.

The Steno SR has established itself as the industry benchmark for private professional [speech recognition microphones](#). Unrivalled recording quality and noise canceling capabilities, as well as an ergonomic design make it the optimal tool for professional dictation users.

Military testing has proven it to be the most accurate and private method of transcription. It is used in every Naval courtroom in America and it's the only voice containment microphone approved by the US armed forces.

Key benefits:

- Complies with HIPPA privacy and security rule
- Decreases potential security risks and protects the privacy of individuals' health information
- Not only does the Stenomask allow for completely private transcriptions it also eliminates all ambient or background noise ensuring a crystal-clear recording
- Lightweight, affordable and road worthy durability
- Compatible with all speech recognition software including [Dragon medical](#)
- No start up time or learning curve, simply plug in and go

There is no need to find a quiet and secure office to verbally document a patient's sensitive information when using stenomask. Whether you have the dictations transcribed by an assistant or use speech recognition software, the process is now completely private. Ensure your patients' care plans are put in place quickly and privately so you can spend more time on patient care

Private dictation microphone for Dragon Medical

Private noise canceling microphone for medical and legal dictation

This speech technology ensures the user's voice is safely transmitted to the computer in highest audio quality and without any interruptions.”
