## [Fat Replacers Market 2017](#)

### Executive Summary

Fat replacers are food substances used to replace all or some part of the fat found in the food and beverages with low calorific content. But, these fat replacers give the food a taste, texture, and a mouthfeel similar to the original full-fat food. Some of the fat replacers are made using a combination of two or more types of sources. The fat replacers are also called as fat substitutes and fat mimetics, and can be used in the F&B industry as taste enhancers, texturizing agents, and stabilizing agents also.

The analysts forecast the global fat replacers market to grow at a CAGR of 6.02% during the period 2017-2021.
