PUNE, INDIA, June 29, 2017 /EINPresswire.com/  
-- [Data Management And Cloud Market:](#)

## Executive Summary

Data analytics is the transformation of raw data into useful information. It is used across all industries to find key information from raw data for better decision making. It examines large amounts of data to identify correlations and hidden patterns that may directly or indirectly affect business. Major companies across different industries are using data analytics tools. Data analytics are specific to the industry. Custom computer programming companies are offering customized data analytics tools based upon the functioning and demands of their clients. For example, the city of Toulouse in France is using IBM's social media analytics platform to identify and prioritize citizens' issues.
