Customer shall be fully refunded if items found defective.

Privacy policy

We do not store the customer's personal info except for notifications and deliveries.

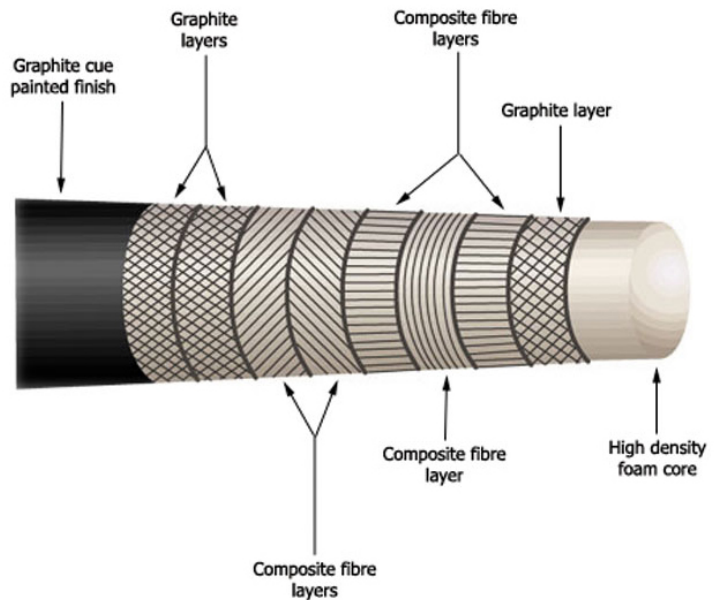

Our exclusive:

Multi Weight Pool Snooker Billiards Cue Sticks

A brief WriteUp about the exclusive Palko Grafex range:

The life of these cuesticks is almost lifetime with proper care and precaution, and would easily outlast and outplay cues with a similar costing. The target is to educate the customer on to a better product that is definitely value for money in the long run, especially for heavy duty use like in pool parlours and snooker halls, where the wood cues are exposed to heat and humidity, and bend out of shape quickly. Our cues also have an added advantage of a multiweight system where any age group can start with weights adjusted to their liking and gradually increase the weight as per their progress. The added advantage is clear with a perfectly straight strokeplay when the cue need not be changed every few years, so as to bring

Graphite cue production

For added strength each layer of the cue is set in a different direction during production.

Palko Grafex Neon Graphite + Fiberglass + Carbon + Composite + Multi Weight Pool Snooker Billiards Cue Stick

Palko Grafex Neon Graphite + Fiberglass + Carbon + Composite + Multi Weight Pool Snooker Billiards Cue Stick

Palko Grafex Neon Graphite + Fiberglass + Carbon + Composite + Multi Weight Pool Snooker Billiards Cue Stick

a level of confidence without having to adjust with every new stick. This is revolutionising the industry like graphite tennis rackets outdid wooden ones. The disadvantage with wood is clear. The torsion based research manufacturing patents that Palko has secured for itself can not be copied and they are the one and only company in the world making a cue sport product of this superior technology. The power to weight ratio imparts more spin and side due to a higher than wood synthetic density which is further aided by the fact that unlike hollow moulded cheaper graphite variants available in the market today this has a truly even weight distribution throughout the cue. That coupled with a perfectly straight shaft ensures pin point accuracy.

Highlights for the same are:

Not Hollow – No Wood Joint – Better than Timber
Elk Master Cue Tip – Pre Shaped – Pre Assembled
Inbuilt Multi Weight System – Ready To Play +1oz x3
Perfectly Straight – Warp Resistant – Super Slim Taper
Patented for More Torsion = Power = Spin

This amazing Cue Stick! Try it to believe it! This is revolutionising the Cue Sports Industry! First time no wood used at all! Not hollow moulded composites like other old technologies! Gives a fantastic feel and finish to your shot! Patented for more torsion = more power to weight ratio!

The uses for the same are:

1. [Graphite Cue Stick](#)
2. [Fiberglass Cue Stick](#)
3. [Multi Weight Cue Stick](#)

Neon – Not Wood – Not Hollow – Not Wood Joint – All Pure Graphite + Fiberglass = Composite Cue Stick – Palko Grafex – Almost Unbreakable
