

WISOLAR opens lead store in South Africa at Roxy's centre, Bronkhorstspuit, Gauteng

WiSolar, South Africa, a leading solar electricity company has opened its first lead store at Roxy's Village Walk Shopping Centre, Bronkhorstspuit, Gauteng,

BRONKHORSTSPRUIT, GAUTENG, SOUTH AFRICA, July 1, 2017 /EINPresswire.com/ -- WiSolar, South Africa, a leading solar [electricity](#) company has opened its first lead store at Roxy's Village Walk Shopping Centre, Bronkhorstspuit, Gauteng, 50km east of Pretoria for central accessibility between Witbank and Pretoria. The burgeoning population and ever-increasing cost of electricity in Bronkhorstspuit and outlying areas has made it necessary for WiSolar's store presence.

WiSolar will share knowledge on the merits and value of renewable solar power as an alternative cheaper and cleaner source of electricity with [residential](#) homeowners and also [companies](#) in and around Bronkhorstspuit.

“

In the following months the store will go completely off-grid to minimize the store's impact on the environment, hedge against the escalating cost of public utility electricity”

Tonye Irimis

Tonye Irimis, founder and Executive Director said “In the following months the store will go completely off-grid to minimize the store's impact on the environment, hedge against the escalating cost of public utility electricity, and also so our walk-in clients can see how solar electricity works, this exemplary use case will be implemented across all our stores as we roll out province by province”

Whilst the initial capital expenditure may be substantial for solar electricity, what is important to note is the fact that a PV system will pay for itself within a 2 to 3 year period. This is made possible by costs saved through not having to pay monthly electricity bills, as well as SARS tax rebates where available.

“WiSolar, Bronkhorstspuit store will also be implementing a daylight harvesting system that reduces its electrical lighting requirements. Other energy-saving technologies include 100% LED lights throughout the store and motion sensors at our stores and storage rooms that automatically switch lights on and off.” concludes Tonye

About WiSolar

WiSolar is a division of Manteecorp (Pty) Ltd and a member of the TI Group of companies providing cheaper and cleaner electricity to the residential and commercial sector of South Africa. Installations are typically completed in 1-2 days.
