[Two-Wheeler Transmission System Market 2017](#)

Executive Summary

The transmission system in a vehicle is used for the proper speed control of the vehicle and for transferring the power produced by the engine to wheels. The growing population across the world is the main reason for the rising congestion on roads. This increases the commuting time between destinations, if travelled by passenger vehicles or public transport facilities. To avoid traffic congestion and to save commuting time, travelers are moving toward two-wheelers, which is the main reason for the increasing motorcycle sales in emerging countries like India, Vietnam, Indonesia, and China.

The analysts forecast the global two-wheeler transmission system market to grow at a CAGR of 7.47% during the period 2017-2021.
