[Chemical Peel Market 2017](#)

Executive Summary

Superficial or light peels are the mildest type of peels available. They only remove the top layer of the skin, known as the epidermis, and give skin an instant brighter look as well as a smoother, and more even texture. They are being demanded by the people who need to minimize the fine lines and wrinkles, mild acne scarring, sun damage, age spots, and dry or flaking skin. They are usually made from alpha hydroxy or beta hydroxy acids, including lactic acid, glycolic acid, and salicylic acid. Nowadays, natural ingredients are being used such as fruit enzymes and acids from natural sources such as pumpkins, pineapples, and cranberries with the increasing demand for natural and organic products.

The analysts forecast the global chemical peel market to grow at a CAGR of 6.85% during the period 2017-2021.
