

Worldwide Motion Control Industry— Expected to Spread and Reach USD - \$22 billion with CAGR of 6% by 2022

Motion Control Market, By Technology (Pneumatic, Hydraulic), By Components Software, By Application (Inspection, Material handling, Packaging), By Industry

PUNE, MAHARASHTRA, INDIA, July 3, 2017 /EINPresswire.com/ -- Global Motion Control Market is expected to grow at CAGR of ~6% during the forecast year and expected to reach at market size of US ~\$22 billion by the end of forecast period.

A motion control system has an important role associated with automated equipment. High flexibility and productivity of the plant can be achieved through a combination of automation and motion control products such as drives and actuators.

Global Motion Control Market is primarily driven by the increased automation that happening in industries such as food and beverage, electrical, electronics, and semiconductor. The research report indicates that there will be a continuous infusion of capital for automation during the forecast period in numerous industries worldwide.

Global Motion Control Market report takes you through the full Market Analysis, Opportunities, Price, Growth, Trends and Featuring the market Predictions right up to the years 2021 and helps you to find out:

- How the market revenue is progressing globally.
- What are the key driving or affecting factors for the market growth?
- How the market revenue is progressing in various segments & geographies.
- Who are the emerging Players, current players & the Key Players (Leaders) of the market? Get yourself acquainted with their trends.
- What are the current main market trends responsible for shaping up the Market Acquisitions

Global Motion Control Market –Segments of Report

Global Motion Control Market is segmented in to five dynamics for better understanding.

- Segmentation on the basis of technology: Includes components, application and industry.
- Segmentation by Technology: Comprises Pneumatic, Hydraulic, and Electromechanical Actuation.
- Segmentation by Components: the market has been derived as- Controller, Drives, Motors, and Software among others.
- Segmentation by Application of motion control includes- Inspection, Material handling, Packaging among others whereas
- Segmentation by industry includes- Manufacturing, Healthcare, Automotive, Aerospace & Defense, Oil & Gas, and Robotics among others.

Global Motion Control Market Report - Reasons To Buy

- The report provides detailed analysis of the market structure along with forecast of the various segments and sub-segments of the Global Motion Control
- Offers insights about factors affecting the market growth.
- Enables to analyze the Motion Control market based porter's five force analysis etc.
- Provides historical and forecast revenue of the market segments and sub-segments with respect to four main geographies and their countries- North America, Europe, Asia, and Rest of the World (ROW)
- Offers country level analysis of the market with respect to the current market size and future prospective
- Provides country level analysis of the market for segment by technology, components, application, industry and sub-segments
- Offers strategic profiling of key players in the market, comprehensively analyzing their core competencies, and drawing a competitive landscape for the market
- Enables to track and analyze competitive developments such as joint ventures, strategic alliances, mergers and acquisitions, new product developments, and research and developments in the Global Motion Control Market

Global Motion Control Market - Intended Audience Report is advantageous mainly to the following Entities:

- OEMs
- Automation Service Providers
- Motion Control Distributors
- Technology Provides
- Sensor Manufacturers
- Connectivity Providers

Global Motion Control Market - Synopsis & Scenario

Motion control is an industrial process which is also defined as servo control or robotics, used in the movement of specific load from one place to another in the controlled fashion. This process is equipped with various hardware equipment, motors, sensors, drives, control units and software are to name a few. Growing industrialization and high adoption of automation in the industrial process is driving the market of motion control whereas the high deployment cost and lack of availability of professionals are some of the major restraints of Motion Control Market.

Global Motion Control Market - Regional Analysis

Asia-Pacific is dominating the market of Motion Control due to the strong presence of manufacturing companies in China, Japan and South Korea. Growing economy of Asian countries are also playing major role in the development of motion control market. Europe stands as second biggest followed by North America. North America motion control market is majorly driven by the factors such as high consumption of electronic equipment and rich presence of healthcare industry.

Global Motion Control Market - Key Players

The key players in the market of motion control are- ABB Group (Switzerland), Rockwell Automation, Inc., (U.S.), Parker Hannifin Corporation (U.S.), Siemens AG (Germany), STMicroelectronics N.V. (Switzerland), Other prominent players include Motion Control Corporation (U.S.), Schneider Electric (France), Trio Motion (U.S.), Emerson Electric (U.S.), AMETEK, Inc. (U.S.), Aerotech Inc. (U.S.) among others.
