

Virotherapy receives significant respect in Vatican's organized XIV International Symposium of University Professors

Virotherapy and off-label medicine use receives significant respect in the Third mission of University in Europe for a human and global development.

RIGA, LATVIA, July 4, 2017 /EINPresswire.com/ -- Based on the invitation, honoury received from the Vatican, International Virotherapy centre representatives – Prof. Peteris Alberts, Prof. Ivars Kalvins and Dr. Simona Donina performed scientific sessions on the therapeutic effects of Oncolytic virotherapy in the Third mission of University in Europe for a human and global development - XIV International Symposium of University Professors.

In the Symposium sessions Virotherapy has received significant respect and interest from the participants – Doctors and Professors from all around the world. This invitation and participation in the Symposium is a great achievement for IVC, acknowledgment for the field of virotherapy and contribution to all mankind.

Prof. Vincenzo Baylon, organizer of the symposium: “ XIV International Symposium of University Professors medical and pharmaceutical sessions are a major medical treatment event. In this event solutions are being sought to make medical treatment more effective and solve the problems related to treatments access, thus helping patients get treatment despite registration and other legitimate issues that is manageable. We invited representatives of International Virotherapy center, professors and medicine professionals, to participate and share their experience in the treatment cancer with virotherapy, because I believe this is one of the most advanced innovative treatment methods in oncology which now and in the closest future will help countless patients to treat cancer effectively, safe and tolerate. Sessions guided by IVC representatives confirmed my positive opinion and received significant acknowledgement among the symposium participants.”

Significant role in the sessions played topic about the medicines that works in patient needs despite registration issues, especially topical themes about off-label medicines. Resuming contemplate aspects regarding use of off label medicines, Professors in the Symposium emphasized once more – off-label use does not mean that the medicine has been used incorrectly without due consideration of the alternative treatments. Especially in oncology, where off-label use can be extensive because of various types of cancer, as well as many used anti-cancer medicines are effective also for indications they are not licensed for.

Scientific Sessions are the part of Symposium's workshops, they are devoted to the needs of patients and their well-being with the wish to represent a stimulus for Regulatory Agencies, European and Nationals, in order to harmonize guidelines and develop new responses in relation to these needs. In this regard, experts and qualified speakers, national and international, discussed issues of at most relevance in the field of off label medicines, orphan drugs, and also issues related to the needs of elderly people affected by neurodegenerative diseases and also by myocardial infarction or “cerebral stroke”.

XIV International Symposium of University Professors was held in Rome, from 22nd till 24th of June,

2017. Symposium was organized by Vatican City State Governorate and is dedicated to mankind. Event is on the occasion of 60th anniversary of Treaties of Rome and took place in Pontifical Lateran University.
