Based on all types of products, the roofing materials market has been segmented as Tile Roof, Metal Roof, Plastic Roof and Others. The Tile roof segment is expected to grow the highest during the forecast period. The tile roofs perform better during harsh weather conditions than other products. Tile roof works well as an insulator, which helps to keep the constructions warm in winter and cool in summers. Tile roofs are also fire-proof and have the ability to resist damage caused by hurricanes, earthquakes, and other extreme weather conditions.

Based on applications, the roofing materials market has been segmented as residential and non-residential. The residential segment is expected to grow the fastest during the forecast period. The growth can be attributed to the construction and renovation activities of residences, across developing nations. The non-residential segment is expected to grow due to factors such as the increasing manufacturing facilities and the ongoing industrial developments across the world.

This study provides an overview of the global roofing materials market, tracking two market segments across four geographic regions. The report studies key players, providing a five-year annual trend analysis that highlights market size, volume and share for North America, Europe, Asia Pacific (APAC) and Rest of the World (ROW). The report also provides a forecast, focusing on the market opportunities for the next five years for each region. The scope of the study segments the global roofing materials market by its product, application and region.
