

VMUG Announces Tech Superstar Line-up for Upcoming Indianapolis UserCon

NASHVILLE, TN, USA, July 6, 2017 /EINPresswire.com/ -- The VMware User Group (VMUG) is excited to announce the lineup for the Indianapolis UserCon on July 18. This event will feature keynotes from Guido Appenzeller, Chief Technology Strategy Officer, Networking and Security - VMware, Josh Atwell, Developer Advocate - NetApp and Eric Wright, Tech Evangelist with DiscoPosse.com.

Guido Appenzeller, Chief Technology Strategy Officer for networking and security at VMware, starts the day with a discussion on “The Journey to the Cloud”. Previously founder and CEO of Big Switch Networks, Guido also founded and was CTO at Voltage Security where he helped them to profitability and over 1,000 Enterprise Customers.

Eric Wright's session, “Containers Concepts and How to Get Started”, discusses how Docker and Kubernetes are becoming the biggest names in the news, so what is it that we should be doing as virtualization admins to prepare for what's coming next? Through a crash course in container concepts and a live demo, he will demonstrate how to add containers to your lab and how to get started with finding container use-cases in your environment.

Josh Atwell's session, “Automating the Next Generation Data Center”, talks about how the datacenter is undergoing a tremendous shift. Additional abstraction layers, changes to virtualization frameworks, the rise of containers, the proliferation of policy based management, and increasing infrastructure extensibility are creating tremendous automation capabilities for datacenters of all sizes. The mission to enable the apps is the same, but the ways we do that are starting to change. In this session, he will discuss these new paradigms and the tools and methodologies that have sprung up to support them.

In addition to the keynotes, attendees will have the opportunity to interact with vendors, sponsors, and partners in the Exhibit Hall and participate in a variety of other technical sessions from VMware and community experts! Also, attendees are encouraged to stay for happy hour and giveaways!

Registration for VMUG UserCon events are open to all members of the tech industry and are free. Visit vmug.com/attend to view the most up-to-date agenda and register for these must-attend event for VMware users.

About VMware User Group (VMUG)

VMware User Group (VMUG) is an independent, customer-led organization made up of more than 100,000 members globally, created to maximize members' use of VMware and partner solutions through knowledge, sharing, training, collaboration, and events. VMUG is the largest user group in the virtualization and cloud infrastructure solutions industry. Interested in joining VMUG? Visit vmug.com and sign up, membership is always free and you can start enjoying the benefits of the VMUG

community immediately.
