High-risk work groups for exposure to asbestos now living in Florida include US Navy Veterans, power

plant workers, shipyard workers, oil refinery workers, steel mill workers, miners, manufacturing workers, plumbers, electricians, auto mechanics, machinists or construction workers. Typically, the exposure to asbestos occurred in the 1950's, 1960's, 1970's, or 1980's. In most instances, the diagnosed person was not exposed to asbestos in Florida but rather in the Northeast or Midwest.
