

Micro-Irrigation Systems Industry is Expected to Grow at a CAGR over 5% From 2016 to 2022

Global Micro-irrigation Market Information- by Type (Micro-sprayers/sprinklers), Material (Plastic, Metal), End Use (Farms) and Region - Forecast to 2022

PUNE, MAHARASHTRA, INDIA, July 7, 2017 /EINPresswire.com/ -- Market Research Future published a Half Cooked Research Report on the Global [Micro-Irrigation Systems Market](#) has been estimated to grow over 5% post 2022

“We enable our customers to unravel the complexity.”

Market Research Future

Market Overview

Major Key Players are Akplas (Turkey), Netafim Ltd Corporate (Israel), Jain irrigation systems (India), Irritec (Italy), Rivulis (Israel), Hunter Industries (U.S.)”

Market Research Future

Micro-irrigation is an approach to irrigation which helps to reduce the water demand, it has been driven by commercial farmers in dry regions of United States of America and Israel in farming areas where water is scarce. Many parts of the world are now using micro-irrigation technology especially small scale farmers in developing countries are slowly adopting this technique. A number of organization are looking at the way to reduce the cost of micro-irrigation and coming up with different innovative approaches such as drip irrigation and pipe irrigation.

Market Forecast

Global Micro-irrigation Systems Market is mainly driven by increasing concern over exhausting water resources and need of efficient use of water especially in regions where water is scarce. Many local governments are encouraging farmers to implement micro-irrigation systems as a standard practice to conserve water which is also driving market growth. Reduction in rainfall due to climate change and pressure to fulfil demand of quality products is supporting the growth of market.

These factors will play a key role to grow Micro-irrigation Systems Market at CAGR of 5.2% during forecast period.

Competitive Analysis-

The major key players in Micro-irrigation Systems Market are Akplas (Turkey), Netafim Ltd Corporate (Israel), Jain irrigation systems (India), Irritec (Italy), Rivulis (Israel), Hunter Industries (U.S.), Antelco (Australia), Lindsay Corporation (U.S.), The Toro Company (U.S.) and Weishi Huifa Machinery Plant (China)

In recent years many key players have introduced new micro-irrigation systems. Netafim has launched its next generation low flow drippers whereas Toro introduced Aqua traxx flow control pipe to increase efficiency to save more waters.

Access the market data and market information presented through more than 25 market data tables and 25 figures spread over 110 numbers of pages of the project report "Micro-irrigation Systems Market - Forecast to 2022"

Downstream market analysis-

Depend upon amount of water available and type of a crop and farming method, different types of micro-irrigation techniques are used. Drip irrigation system is considered as most efficient micro-irrigation technique. People from South Australia has recently developed the new micro-irrigation technique named "Measured irrigation" which basically operates on rain water and sunlight. Farmers from developing countries prefers to buy affordable and efficient micro-irrigation technique and it is mainly influenced by government initiatives in that particular region. Irrigation system based on real time sensor is becoming popular in developed countries.

Regional Analysis

The global Micro-irrigation Systems Market is segmented into North America, Europe, Asia Pacific, and Rest of the World (RoW). Among this North America region has major market share followed by Europe and APAC. Mexico, U.S., India, Australia and France are major importers of micro-irrigation systems from last few years. Micro-irrigation is being newly implemented in developing countries especially from Asia and Africa.

Market Segmentation-

Global Micro-irrigation Systems Market is segmented by type, material and end use.

About Market Research Future:

At [Market Research Future \(MRFR\)](#), we enable our customers to unravel the complexity of various industries through our Cooked Research Report (CRR), Half-Cooked Research Reports (HCRR), Raw Research Reports (3R), Continuous-Feed Research (CFR), and Market Research & Consulting Services.

MRFR team have supreme objective to provide the optimum quality market research and intelligence services to our clients. Our market research studies by products, services, technologies, applications, end users, and market players for global, regional, and country level market segments, enable our clients to see more, know more, and do more, which help to answer all their most important questions.

In order to stay updated with technology and work process of the industry, MRFR often plans & conducts meet with the industry experts and industrial visits for its research analyst members.
