

Mobile Video Surveillance Market Trends, Key Vendors Analysis, Import & Export, Revenue by Forecast to 2023

Mobile Video Surveillance Market, Component (Hardware, Software, Services) - Forecast 2023

PUNE, MAHARASHTRA, INDIA, July 10, 2017 /EINPresswire.com/ -- [Mobile Video Surveillance Market](#) Overview:

Mobile video surveillance allows surveillance of a particular area through mobile devices. Mobile video surveillance has gained immense popularity owing to its flexible nature which facilitates remote monitoring of the school buses and trains in transit. This allows better security for school buses which can be monitored easily through mobile devices. Mobile devices can now review surveillance footage in real time, dramatically expanding the opportunity for monitoring situations. Also, there is a growing trend for mobile surveillance cameras to transmit footage in real time back to a control center, supporting better assessments of emergency situations.

Market Research Future

The Mobile Video Surveillance Market is segmented on the basis of component, system and application. The system segment comprises of analog video surveillance and IP video surveillance. Analog video surveillance offers no remote accessibility and are quite difficult to integrate into already existing infrastructure. Another restraint about analog video surveillance is that they are labor intensive. IP video surveillance is simple and cost effective in comparison to analog video surveillance. IP video surveillance systems are

flexible, resilient, easy to deploy and convenient to manage. Due to wireless support provision, IP video surveillance proves to be a feasible approach for mobile video surveillance.

According to a recent study report published by the Market Research Future, The Global Market of Mobile Video Surveillance has increased its market growth in recent years and is expected to grow at a rapid pace during the forecast period. The global market of Mobile Video Surveillance is forecasted to witness a thriving growth of approx. USD 27 Billion by 2023, at striking CAGR of 14% between 2017 and 2023.

Major Key Players:

- Seon (Canada)

- Apollo Video Technology (U.S.)
- Mid State Instruments (U.S.)
- Floatograph Technologies LLC. (U.S.)
- Maxxess Systems, Inc. (U.S.)
- Strongwatch Corporation (U.S.)
- Safety Vision, LLC. (U.S.)
- Rosco Vision Systems (U.S.)
- Maryland Security Professionals (U.S.)
- Briefcam (Israel)

Mobile Video Surveillance Market – Segments

The Mobile Video Surveillance Market is segmented in to 4 key dynamics for the convenience of the report and enhanced understanding;

Segmentation by Component: Comprises citric acid, flavors, & preservatives, salts & electrolytes, carbohydrates, vitamins, and others.

Segmentation by System: Comprises hypotonic, isotonic and hypertonic.

Segmentation by Application: Comprises athletes, casual consumers and lifestyle user, and others.

Segmentation by Regions: Comprises Geographical regions - North America, Europe, APAC and Rest of the World.

Mobile Video Surveillance Market Synopsis

The mobile market is fast catching up with the technological advancements in the video surveillance industry. A huge untapped market combined with significant funds is opening the doors for some real activity in this market in the coming years. The migration from traditional analogue solutions to IP ones is slower than the static video surveillance market because of the roughened characteristics of the systems in the space coupled with the price-sensitiveness of the market.

The increasing shift from analog to IP cameras by the various enterprises will drive the growth prospects for the global Mobile Video Surveillance market in the years to come. This shift from analog to IP camera enables various end-users to cover a large area for surveillance such as stadiums, city surveillance projects, and hotels, which, in turn, will propel the demand for Mobile Video Surveillance systems. Some of the major factors responsible for the growing adoption of IP cameras is the low cost of installation, low cost of maintenance, cheap labor, and low total cost of ownership. Also, it has been observed that these cameras have various features such as high quality, flexibility, scalability, easy installation, and compatibility with the changing needs of customers. Moreover, components such as servers or encoders are built-in with IP cameras, which help in image encryption, provide multi-level user access control, and prevent third-party manipulation.

Regional Analysis:

The regional analysis of mobile video surveillance market is being studied for regions such as Asia Pacific, North America, Europe and Rest of the World. It has been observed that North America is estimated to account for the largest share of the market, whereas Asia-Pacific projected to grow at the

fastest rate during the forecast period. Owing to larger market size in North America region, there is also higher acceptance for mobile video surveillance. School buses and Police cars represent the largest market share in the North America region.

About Market Research Future:

At Market Research Future (MRFR), we enable our customers to unravel the complexity of various industries through our Cooked Research Report (CRR), Half-Cooked Research Reports (HCRR), Raw Research Reports (3R), Continuous-Feed Research (CFR), and Market Research & Consulting Services.

MRFR team have supreme objective to provide the optimum quality market research and intelligence services to our clients. Our market research studies by products, services, technologies, applications, end users, and market players for global, regional, and country level market segments, enable our clients to see more, know more, and do more, which help to answer all their most important questions.
