## Market Forecast

The Global Fruit Vinegar Market is witnessing an impressive growth over the last few years. With the changing lifestyle and evolving dietary pattern, consumers are interested in healthy food & beverages. Fruit vinegar is a nutritional powerhouse of health and beauty benefits. Fruit vinegar enhances the immunity and eliminates fatigue effectively. Apart from that, fruit vinegar offers vitamins and amino acids which in turn encourage the food manufacturers to use fruit vinegar. Fruit vinegar also finds application in the cosmetic & personal care sector because vitamin D is present in the fruit vinegar that prevents the cell aging and strengthens the immunity of the body. Fruit vinegar offers anti-glycemic properties to diminish blood sugar level. Its acetic acid minimizes blood sugar by averting the complete digestion of complex carbohydrates. Due to the increasing usage of fruits vinegar, manufacturers are coming up with the various new flavor of fruit vinegar in order to attract new customer that in turn intensifies the sales of fruit vinegar during the forecast period of 2017-2023. Fruit vinegars manufacturers find a massive opportunity to come in collaboration with the various organized food service companies in order to enhance their presence in the market.

Access the market data and market information presented through more than 60 market data tables and 25 figures spread over 110 numbers of pages of the project report “Global Fruit Vinegar Market - Forecast to 2023”

#### Downstream Analysis-

Berries is estimated to be an attractive ingredient of the fruit vinegar among all the fruit vinegar manufacturers accounting for more than 30% of market proportion in the fruit vinegar market. However, citrus fruits are estimated to witness the maximum growth as compare to the other segments during the review period of 2017-2023. Among the application, food segment is holding maximum market proportion in the year of 2017. But, beverages segment is estimated to account for the highest market proportion by the end of forecast period.
