

Collective2 Adds Support for Acclaimed Multi-Broker Trading Platform IQBroker

Integration Allows Collective2 Trade Leaders to Use IQBroker's Powerful Algorithmic Trading Software to Design, Test, and Deploy Strategies on Collective2.

NEW YORK, NEW YORK, UNITED STATES, July 12, 2017 /EINPresswire.com/ -- NEW YORK, New York, July 11, 2017 – [Collective2](#) (C2), the online platform which connects investors with independent traders, and [IQBroker](#) (IQB), the advanced algorithmic and discretionary trading platform, announced today that IQBroker has been chosen as C2's first Preferred Trading Platform. Due to the tight integration of IQBroker and C2, IQBroker is now the most attractive platform for publishing trade signals and managing portfolios on C2.

Using IQBroker's built-in IQScript designer, C2 users are able to program strategies written in C#, F#, VB.NET, R.NET or using Microsoft Visual Studio. IQBroker's backtesting and optimization capabilities are unparalleled, allowing multiple strategies within a portfolio to trade multiple symbols on multiple exchanges, and to use multiple bar-types, news feeds, RSS feeds, and fundamental data.

For discretionary traders, IQBroker features advanced charting, hundreds of indicators, trade pads, watchlists, DOM, alerts, conditional orders, and much more.

Matthew Klein, CEO of Collective2 LLC said: "The first time we saw IQBroker, our team was blown away. We have not seen anything even close to IQBroker's capabilities in any commercially-available execution platform or algorithmic trading software. We're excited to offer the IQBroker platform to Collective2 users."

IQBroker Founder and CEO Daniel Tochner said: "Collective2's history of attracting systematic, automated traders is a perfect fit for IQBroker. Whether you are a developer or a point-and-click trader, IQBroker will help you better manage your Collective2 strategies. We invite C2 Trade Leaders currently using TradeStation, NinjaTrader, Interactive Broker's TWS, or any other platform, to download and give IQBroker a try."

About IQBroker

The result of over 11 years of R&D, IQBroker is one of the most powerful and feature-rich broker-neutral trading platforms for equities, futures and forex. Designed as the ultimate solution for backtesting, optimizing and executing a portfolio of algorithmic trading strategies, IQBroker has received rave reviews from quantitative and algorithmic traders all over the world. For more information, please visit www.iqbroker.com.

About Collective2

Founded in 2001, Collective2 is an investing website with more than 100,000 registered users. Great traders from around the world ask Collective2 to track their trading results in real-time. Other investors can "subscribe" to these traders, and can automatically follow their trades in their own brokerage account. Over \$75 million dollars of investor capital is linked to strategies on the Collective2

platform. For more information, please visit www.collective2.com
