This is one of the major factors due to which the demands of red wine are experiencing a surge. In Europe, France is amongst the dominating countries holding a major share in red wine market and exports the product in various other countries which include U.S., China, Germany, Belgium, U.K. and others.

Access the market data and market information presented through more than 25 market data tables and 25 figures spread over 110 numbers of pages of the project report “Red Wine Market - Forecast to 2023”

Market Forecast

Globally, the red wine market share is estimated to escalate at a higher growth rate than white wine due to its rich resveratrol content which imparts anti-ageing properties. The high consumption of red wine is backed up by its property to lower cholesterol level in the body when consumed in right quantity. The rising demand for low calorie red wine in the market is supporting its sale on a global level. Rapid urbanization has also supported in fueling up the market share of red wine all around the globe.

All these factors contribute to the calculated CAGR of 3.6% of Red Wine market during 2017-2023.

Downstream Analysis-

Consumption of still wine is growing at significant rate based on its rich and authentic wine flavor. However, the sale of sparkling red wine varieties is evaluated to be growing prominently. The high alcohol content of dry wine makes it popular amongst the consumers of Europe while the medium and sweet varieties of wine is found to be more popular in Asia-Pacific and North America region. In addition, similarly the sale of Light wine body type of wine is anticipated to hold a lion's share during the forecast period.

The rich flavor and aroma of Cabernet Sauvignon makes its share significant in the red wine market followed by Merlot red wine. The high popularity and wine drinking trend in Europe region has increased the consumption and sale of red wine in various countries of the region.
