Steno SR Pro Series: The best speech recognition accuracy even in noisy environments

Product Innovation: The Steno Sr Pro Series with brand-new Smartmic technology and unique noise cancellation sets standards for the dictation experience.

BOSTON, UNITED STATES, July 13, 2017 /EINPresswire.com/ -- Every professional using dictation devices has already experienced this problem: suddenly and unexpectedly occurring background noises which considerably impair the recording and render transcription more difficult. Previously disturbances could never be excluded, users had always been prone to the risk that the words are falsely transcribed into text by the speech recognition, or that the person who must manually transcribe the audio file simply must omit incomprehensible passages. This problem is solved now: The Steno SR Series by Talk Technologies guarantee best speech recognition accuracy even in in noisy environments and make sure that users get clearly understandable recordings without any disturbing background noises.

Noise Cancellation Technology for Optimum Speech Recognition Results

The new Steno SR Series is characterized by a unique microphone system with innovative noise cancelling technology. Testing conducted in noisy environments showed peak speech recognition performance. The technology provides optimum reduction of unwanted background noises and best results for transcription and speech recognition.

Industry best noise cancelling, speech recognition microphone
