

Managed Security Services Market is to grow at a CAGR of 12% by Forecast to 2022

Managed security services Market, By Service Type (IPS and IDS, DDOS, Endpoint security) - Forecast 2022

PUNE, MAHARASHTRA, INDIA, July 14, 2017 /EINPresswire.com/ -- Market Highlights:

In this rapidly changing environment, demand for advanced security is ever increasing. The increasing dependence on internet of things (IoT) and big data are increasing the amount of threat prone data and diverting focus of organizations to secure the data while cutting the operational costs which is responsible to drive the managed security services market. The managed security services are cost effective solution for security.

“

IBM (U.S.), Verizon Communications (U.S.), CenturyLink (U.S.), AT&T (U.S.), Symantec Corporation (U.S.)”

Market Research Future

The study indicates that in this changing environment, rising number of security attacks and malicious practices by organized cybercriminal groups are alerting high security concerns among the organizations across all industry sectors. Apart from it, the increased complexities in network infrastructure are proving to be major obstacles in data security management. Therefore the adoption of managed security services helps to overcome these challenges.

The Managed Security Services Market is driven due to numerous advantages such as it is less expensive, it is reliable, and it provides effective security solutions and others. The changing customer demands regarding security package and hesitancy to share sensitive data are some of the restraining factor for managed security services market.

The Managed security services Market is growing rapidly over 12% of CAGR and is expected to reach at USD 34 Billion by the end of forecast period.
