PUNE, INDIA, July 14, 2017 /EINPresswire.com/ --

[Aquatic Feed Ingredients and Products Market 2017](#)

Executive Summary

Formulated aqua feed, which contains vital ingredients for aquatic species such as fish, crustaceans, and mollusks, is mostly available in the form of pellets. Depending on the fish species, these pellets vary in size. Additionally, depending on where different fish species are reared, the composition and properties of these feed pellets can be altered so that they can either float on the water surface or sink to the bottom of the tanks. These products have been garnering rapid popularity, as the content of different nutrients in these feed products can be controlled, depending on the climate and species type. Aquatic feed additives such as amino acids, antibiotics, and vitamins are used to improve fish health and yield.

The analysts forecast the global aquatic feed ingredients and products market to grow at a CAGR of 11.31% during the period 2017-2021.
