Anywhere, Anytime and Any Device.

Gone are the days when we just sit at a desk in an office with a landline and a computer. We need powerful tools to keep pace with our fast-paced world as a single, integrated business communications solution that vastly improves your daily workflow, and works from wherever you happen to be?

- UC-One unified communications platform is purpose-built for productivity with Carrier Grade Quality, Security, Flexibility and Scalability.
- UC-One is an easy to-use interface for accessing instant messaging and presence, HD audio and video calling, desktop and file sharing, conferencing and mobility
- You can locate, message call, and collaborate with colleagues, access your corporate directory, easily establish ad hoc conferences and use find me/follow me to never miss a call.
- UC-One brings together HD voice and video conferencing, multi-party chat and desktop sharing.
- It's all accessible on demand through a simple and intuitive interface on Desktop, Mobile and Tablet. Make Teamwork Simple with Team-One

Team-One is an all-in-one team messaging and business collaboration app with built-in integrated calling and live meetings.

- Team-One is available on iOS, Android, web and desktop applications.
- With this amazing Application, you can have discussions, video chat and share screens all in easily organised persistent workspaces
- Track tasks, drag and drop files and keep notes in the same space
- Stay on track with email and calendars integrations that make your team communications easier to

manage

- Take meeting minutes, create and assign tasks, track due dates, and share files completely transparently and efficiently with everyone.
- Invite and collaborate with external team members too such as partners, vendors and customers.
- Experience the power of Team-One's workspace model with all your team's work in one place!

Organisation at Work

The Team at Work is a big challenge for all small to medium businesses, and Broadsoft has a solution for this - BroadSoft's Hub cloud aggregation service makes everything simpler. It combines your communications with your business cloud applications and puts what's important to your conversation together in one place.

BroadSoft applications create a significant differentiator from other market solutions, being less expensive, flexible and easy to use, Scalable, Mobile worker supportive and Integrated with IT systems, Resilient and maintenance friendly.

800Comms has bundled different services to packages for small to medium, Large Business, Call Center, Hospitality group and Google Apps For Business.

Besides your voice communications need, 800Comms has solutions, based on Cisco Meraki, to manage your business-critical mobile devices, Macs, PCs, and your entire network with comprehensive monitoring, diagnostics and security, and CloudGenix SD-WAN - a vendor-independent solution for networking flexibility and security perimeter.
