

# 1SEO Tech Adds Two 2017 Ford Focus Hatchbacks to its Fleet

*After recent growth, the Philadelphia area IT consulting firm puts two brand-new service vehicles on the road.*

BRISTOL, PA, UNITED STATES, July 20, 2017 /EINPresswire.com/ -- Earlier this week, 1SEO Tech added two brand-new, 2017 Ford Focus Hatchbacks to its existing fleet of service vehicles.

One vehicle is mostly white with a blue streak and red paint that goes along the bottom of the doors and around the back. On the other vehicle, the color scheme is reversed—with red being the dominant color on the front.

Drivers in the Tri-State area will easily notice the new rides by spotting the 1SEO Tech logo on the sides and even one on the hoods of each vehicle. Below the logos on the doors reads: Serving the Tri-State Area for more than 30 years!

Lettered on the rear passenger doors are the three main services they provide: Managed Services, IT Support and [Cloud Solutions](#). And painted on the rear windshields of the hatchbacks is an image of 1SEO Tech's President, Scott Fcasni. "ASK THE EXPERTS" is lettered next to him with the company's website URL included below.

“

We're growing quickly. Putting more cars on the road will help us get to our clients faster when they need us.”

"We're growing quickly," Fcasni said. "Putting more cars on the road will help us get to our clients faster when they need us.”

“The two hatchbacks make a great addition to our Ford Transit Connect,” he added, which they bought and designed early last May. “The decals will help spread the word about our services, and the capability of the vehicles will ensure our team is always prepared for onsite support.”

Whether a business owner is looking for [pharmaceutical IT support in South Jersey](#), for example, or [managed network services in Bucks County](#), 1SEO Tech does it all. Improving the protection and performance of a client's network gives way to a more productive workplace.

1SEO Tech holds a strong commitment to helping companies thrive through technology. This way, an

innovative combination of security and speed ensures they stay ahead of the technology curve.
