The products comprise wetting agents, emulsifiers, dispersants, detergents, chelating agents, and biocide active ingredients. Growing environment concern regarding the adverse effects of these chemicals may emerge as a major barrier to the overall market development. Contaminated water and water shortages caused by an intensive fabric industry may have extensive local consequences in the manufacturing countries. Stringent environmental regulation such as Integrated Pollution Prevention and Control (IPPC) along with Emission Trading System (ETS) and regulation on registration, evaluation, authorization and restriction of chemicals is expected to hinder growth.

Technological improvement coupled with growing clothing demand is allowing manufacturers to offer exceptional marketing points such as stain-resistance, wrinkle-resistance, soft finish and antimicrobial properties to provide enhanced performance and comfort to customers. Moreover, increasing consumer spending towards high quality products especially in Canada and Mexico is anticipated to positively influence the industry over the forecast period.

Textile chemicals have the ability to make fabric versatile, stronger, and enhanced their original characteristics. The U.S. textile chemicals industry is driven by the development of technical fabrics, presence of multinational companies and continuous R&D to discover novel textile products. High adoption of advanced technologies and increasing number of manufacturing lines to support the growing clothing demand are some of the factors boosting the industry growth in the region.

About Market Research Future:

At Market Research Future (MRFR), we enable our customers to unravel the complexity of various industries through our Cooked Research Report (CRR), Half-Cooked Research Reports (HCRR), Raw Research Reports (3R), Continuous-Feed Research (CFR), and Market Research & Consulting Services.

MRFR team have supreme objective to provide the optimum quality market research and intelligence services to our clients. Our market research studies by products, services, technologies, applications,

end users, and market players for global, regional, and country level market segments, enable our clients to see more, know more, and do more, which help to answer all their most important questions.

In order to stay updated with technology and work process of the industry, MRFR often plans & conducts meet with the industry experts and industrial visits for its research analyst members.
