Wiseguyreports.Com Adds “Building-Integrated Photovoltaics -Market Demand, Growth, Opportunities and Analysis of Top Key Player Forecast To 2022” To Its Research Database

According to Statistics MRC, the Global Building-Integrated Photovoltaics market is accounted for \$6.94 billion in 2015 and is expected to reach \$28.6 billion by 2022 growing at a CAGR of 22.4% from 2015 to 2022. Factors like demand for electricity, energy efficient constructions, smart wire connection technology and solar ready roofs for commercial & residential buildings will drive the market. However, high cost of installation and storage, absence of specific standards and codes and variations in measurement units are the major factors restraining the market growth. Resilient growth in solar PV industry will offer opportunities for the Building-Integrated Photovoltaics market.

The demand for facades is expected to grow, majorly driven by the increasing demand for integrated facades. Curtain wall is expected to grow with a considerable market share for its low maintenance cost and properties. The technology segment is commanded by Crystalline Silicon building integrated photovoltaics. The industrial segment accounted for the highest revenue share due to higher endorsement of the silicon for industrial applications. Europe is the largest market revenue generator mainly attributed to the increased investments in several countries, especially Germany, Belgium, Denmark, Greece, and the UK and also demanding legislation related to energy performance in buildings.
