PUNE, INDIA, July 24, 2017 /EINPresswire.com/ --

[Liver Disease Treatment Market 2017](#)

Executive Summary

Liver is the largest organ of the body and can completely recover from damage. However, continuous strain on the liver, when treatment is delayed, for a prolonged period of time can lead to severe damage to the liver and can even be fatal. Viral hepatitis is one of the major liver diseases affecting a large number of people across the globe. This is caused by viral infections and spread through contaminated food and water. Poor sanitation facilities in developing countries such as India and China has led to a higher prevalence of the disease in these countries. There has been a rise in healthcare investment in these countries.

The analysts forecast the global liver disease treatment market to grow at a CAGR of 11.01% during the period 2017-2021.
