

Sankalp Semiconductor to hire 300 engineers

Doubles capacity of Kolkata Design Center

BANGALORE, KARNATAKA, INDIA, July 26, 2017 /EINPresswire.com/ -- [Sankalp Semiconductor](#) a design service

company offering comprehensive digital & mixed signal SoC solutions, today

announced its plan to hire 300 engineers in the next 12 months. Sankalp plans to hire engineers for its India design centers in Bangalore, Hubli and Kolkata. The hiring plans will enable Sankalp to meet demands from its existing and new customers in North America, Europe and Asia. Sankalp provides services in the digital, analog & mixed signal, custom layout and technology foundation space. These

services have enabled customer to build semiconductor solutions for automotive, consumer, IoT, networking markets.

“

We are witnessing excellent growth in digital and mixed signal design services space and will be hiring a health mix of experienced and fresh engineering talent.”

*Nagaraj Azhakesan, COO,
Sankalp Semiconductor*

“We have doubled the capacity of our Kolkata design center, and have aggressively started recruitment for all our design centers.” Said Nagaraj Azhakesan, COO, Sankalp Semiconductor. “We are witnessing excellent growth in digital and mixed signal design services space and will be hiring a health mix of experienced and fresh engineering talent.”

The new Kolkata facility will have an additional seating capacity for 100 engineers. The Kolkata center will continue to

execute and focus on complex mixed signal design projects. Sankalp’s multisite design center model has enabled the company to attract talented engineers from various cities. All the fresh engineering graduates go through a structured 6 months on the job training program that enables them to come up to speed with Sankalp’s customer delivery and quality standards.

About Sankalp Semiconductor

Sankalp Semiconductor offers an integrated portfolio of services and solutions to its customers in key semiconductor domains including digital, analog, high-speed physical interface IP, Embedded Memory Compiler and EDA modelling. Sankalp Semiconductor is a preferred semiconductor design service partners to multiple Fortune 500 companies in the Automotive, Consumer Electronics, Industrial IoT and Medical electronics space. The company enables its customers achieve their time-to-market window by delivering first pass silicon designs and engage with product engineering teams across the globe to design System-on-Chip. Sankalp Semiconductor is based in Sunnyvale, California, with multiple development and services centers in India, Canada and Germany.
