

Video Surveillance Market Analysis 2017 (By Segment, Key Players and Applications) and Forecasts To 2021

Video Surveillance Global Market Share, Opportunities, Segmentation and Forecast to 2021

PUNE, INDIA, July 25, 2017 /EINPresswire.com/ -- Pune, India, 25 July 2017: WiseGuyReports announced addition of new report, titled “Global [Video Surveillance](#) Market: Industry Analysis & Outlook (2017-2021)”.

Video surveillance, also known as closed-circuit television (CCTV), is the use of video cameras to transmit a signal to a specific place, on a limited set of monitors. It differs from broadcast television in that the signal is not openly transmitted, though it may employ point to point (P2P), point to multipoint (P2MP), or mesh wired or wireless links. Though almost all video cameras fit this definition, the term is most often applied to those used for surveillance in areas that may need monitoring such as bars, banks, casinos, schools, hotels, airports, hospitals, restaurants, military installations and other areas where security is needed.

Video Surveillance is used by governments for intelligence gathering, prevention of crime, protection of a process, person or the investigation of crime. It is also used by criminal organizations to plan and commit crimes, such as robbery and kidnapping, by businesses to gather intelligence, and by private investigators. Due to technological advancements, now there are high resolution cameras which have a better quality and long transmissions. There are various video surveillance equipments present in the market today like CCTV, security cameras, analogue security cameras, network security cameras, video encoders, VMS, hardware NVRs, DVRs, megapixel network security cameras, and network video surveillance equipments.

The global video surveillance market is set to experience favourable growth driven by factors such as increasing international terrorism, Internet of Things (IOT) opportunity and growing urban population. Further, the scope of market growth will be broadened by development of smart cities worldwide and global economic development. However, growth of this budding market will be hindered by associated high cost, stringent regulations and poor trading environment.

The report “Global Video Surveillance Market: Industry Analysis & Outlook (2017-2021)” analyses the development of this market, with focus on China, U.S. and Europe. The major trends, growth drivers as well as issues being faced by the market are discussed in detail in this report. The four major players: Hikvision Digital Technology, FLIR Systems Inc., Hanwha Techwin Co. and Tamron Co. & are being profiled along with their key financials and strategies for growth. The report contains a comprehensive analysis of the global video surveillance market along with the study of the regional markets.
