

Military Imaging System Market Trends with Worldwide Industry Analysis to 2023

Global Military Imaging System Market Information Report by Type, by Platform and by Region - Forecast to 2023

PUNE, MAHARASHTRA , INDIA , July 26, 2017 /EINPresswire.com/ -- Market Research Future published a half cooked research report on the global [military imaging system market](#). The global military imaging system market is expected to witness a significant growth, during the forecast period 2017 to 2023.

Key Players: FLIR Systems, Inc., Teledyne Technologies Inc., L3 Technologies, Inc., Lockheed Martin Corporation, Thales Group”
Market Research Future

Market Highlights:

The military imaging system is able to provide high-resolution 3-D images from longer distances than conventional optical systems. It is used to improve the visibility and enhance the clarity of objects even in dark environmental conditions.

Increasing the use of these systems in border patrolling and for border security would significantly drive the market. Moreover, the introduction of high definition imaging technologies such as the thermal imaging systems also boosts the market. However, their efficiency during extreme weather conditions and the increased usage of smokescreen technologies are factors that can hamper the growth of the market.

On the basis of platform, the global military imaging system market is segmented as man portable and vehicle mounted. Military imaging system is mounted on the vehicles such unmanned aerial vehicles (UAVs), ground vehicles, and others. It is expected that the market for man portable military imaging systems would grow at a faster pace during the forecast period.

Therefore, the global military imaging system market is expected to witness significant growth during the forecast period.

Key Players of Military Imaging System Market:

- FLIR Systems, Inc. (US)
- Teledyne Technologies Inc. (US)
- L3 Technologies, Inc. (US)
- Lockheed Martin Corporation (US)
- Thales Group (France)
- BAE Systems (US)
- Raytheon Company (US)
- Harris Corporation (US)
- General Dynamics Mission Systems, Inc. (US)
- Leonardo DRS (US)

Market Research Analysis:

On the basis of type, the global military imaging system market has been segmented as thermal imaging, hyper spectral imaging, and multispectral imaging. These imaging systems are being increasingly used for surveillance by the airborne, maritime, and land forces. Thermal imaging segment dominates the global military imaging system market. Hyper spectral imaging, and multispectral imaging type is expected to contribute significantly during the forecast period.

Scope of the Report:

This study provides an overview of the global military imaging system market, tracking two market segments across three geographic regions. The report studies the key players, providing a five-year annual trend analysis that highlights market size, volume and share for Americas, EMEA, and Asia Pacific. The report also provides a forecast, focusing on the market opportunities for the next five years for each region. The scope of the study segments the global military imaging system market as type and platform.

Global Military Imaging System Market, By Type

- Thermal Imaging
- Hyper spectral Imaging
- Multispectral Imaging

Global Military Imaging System Market, By Platform

- Man Portable
- Vehicle Mounted

Brief TOC:

- 1 Executive Summary
- 2 Introduction
 - 2.1 Report Description
 - 2.2 Research Objective
- 3 Research Methodology
 - 3.1 Scope of the Study
 - 3.1.1 Definition
 - 3.1.2 Research Objective
 - 3.1.3 Assumptions
 - 3.1.4 Limitations
 - 3.2 Research Materials
 - 3.2.1 Primary Research
 - 3.2.2 Secondary Research
 - 3.3 Market size Estimation
 - 3.4 Forecast Model
- 4 Market Dynamics
 - 4.1 Market Drivers
 - 4.2 Market Inhibitors
 - 4.3 Supply/Value Chain Analysis
 - 4.4 Porter's Five Forces Analysis
- 5 Global Military Imaging System Market, By Type
 - 5.1 Introduction
 - 5.2 Thermal Imaging
 - 5.3 Hyperspectral Imaging
 - 5.4 Multispectral Imaging

About Market Research Future:

At Market Research Future (MRFR), we enable our customers to unravel the complexity of various industries through our Cooked Research Report (CRR), Half-Cooked Research Reports (HCRR), Raw Research Reports (3R), Continuous-Feed Research (CFR), and Market Research & Consulting Services.

MRFR team have supreme objective to provide the optimum quality market research and intelligence services to our clients. Our market research studies by products, services, technologies, applications, end users, and market players for global, regional, and country level market segments, enable our clients to see more, know more, and do more, which help to answer all their most important questions.

In order to stay updated with technology and work process of the industry, MRFR often plans & conducts meet with the industry experts and industrial visits for its research analyst members.
