Access the market data and market information presented through more than 25 market data tables and 25 figures spread over 110 numbers of pages of the project report “Organic Spices Market - Forecast to 2022”

## By Application analysis-

Based on organic spice function, flavor formed an essential function base for organic spices enabling it to gain maximum share in the year 2016 followed by color. Spices have been majorly used for flavoring or as a garnish since ancient times. The flavor of a spice is derived in part from compounds (volatile oils) from various parts of plants roots, seeds, bark and other plant parts. Based on organic spice form, whole form and powdered form held a major share in the organic spices market in the year 2016. Increase in demand for convenience products there is strong potential for powder form growth in the organic spices market. Crushed/chopped/flakes are emerging as new segment especially for bakery and pizza

## Regional Analysis:

The Global Organic Spices Market is segmented into North America, Europe, and Asia Pacific along with rest of the world (RoW). Asia-Pacific region is estimated to dominate the market in the year 2016 followed by North America. India, China and Vietnam are major organic spice producers in the Asia-Pacific region. Presence of various agro-climatic zones and seasons support various organic spices production in this region. Guatemala and Mexico are major organic spices market in the North-American region. Strong potential of spices production and consumption favors organic spices market growth the most among the various regions in the world.
