Market Research Future

Color defines the degree of quality and nutrient content of foods. It plays an important role in enhancing product appearance and make it appealing. Food coloring agents are used to augment the color loss during processing. Natural food color is any dye, pigment or any other substance obtained from vegetable, animal, mineral, or source capable of coloring food drug, cosmetic or any part of human body. Natural colors are sourced by natural and organic sources such as seeds, fruits, vegetables, algae and insect.

Region Analysis

The global natural food color ingredients market is segmented into North America, Europe, Asia Pacific and Rest of the world. Among this Europe has the major market share followed by North America. The market is estimated to grow at an above average CAGR during the forecast period. This is attributed by the mounting growth of food industry in Germany, France, UK and other Western Europe countries. Also, the presence of key players in Europe region is also anticipated to fuel the sales of natural food color ingredients in that particular region. However, Asia Pacific region is projected to register maximum CAGR during the forecast period. The growth is contributed by the higher level production in countries like Australia and New Zealand. Also, the food color industry in Asia Pacific region is experiencing a substantial growth in recent years which in turn will positively drive the growth of natural food color ingredients market in the Asia Pacific region. Increasing population in developing countries such as China and India, changing lifestyles & consumption pattern of the consumer is anticipated to stimulate the overall natural food color ingredients market in Asia Pacific region during the forecast period.
