Wiseguyreports.Com Adds "[Agricultural and Forestry Machinery](#) Market 2017 Global Analysis, Growth, Trends and Opportunities Research Report Forecasting to 2022"

The Global Agricultural Machinery market is expected to grow from \$1.63 billion in 2015 to reach \$2.67 billion by 2022 with a CAGR of 7.3%. Global Forestry machinery market is valued at \$7.16 billion in 2015 and is expected to reach \$9.81 billion by 2022 growing at a CAGR of 4.6% between 2015 and 2022. The factors such as rising demand for advanced machinery, increasing mechanization of farming operations, and technological advancements are driving the market growth. Moreover, the increasing demand for the food led by the growing population across the globe is another key factor fueling the agriculture and farm machinery market across the globe. Lack of information about farming equipment and its efficiencies among farmers is inhibiting the market growth.

Harvesting machinery segment is projected to grow with highest CAGR value during the forecast period due to growing usage of mechanized harvesting and on-site processing equipment in developing areas. The Asia Pacific region led by India and China is expected to be the fastest growing region. The high demand can be attributed to the rising food consumption for sufficing the rising population in these countries.
