

# Animal Feed Industry Analysis, Future Growth, Business Prospects and Worldwide Forecast to 2027

*Global Animal Feed Market Information- by Source (Vegetables), Function (Carbohydrate), Application (Cattle, Swine) and Region - Forecast to 2027*

PUNE, MAHARASHTRA, INDIA, July 29, 2017 /EINPresswire.com/ -- Market Research Future Published a Half Cooked Research Report (HCRR) on the Global [Animal Feed Market](#)

“ We enable our customers to unravel the complexity.”

Market Research Future

Animal Feed Global Market – Overview

Major Key Players are Cargill Inc, Charoen Pokphand Foods Public Company Limited, Novozymes A/S, Chr. Hansen Holding A/S, BASF SE, ., Archer Daniels Midland Company, Alltech, Evonik Industries AG”

*Market Research Future*

According to a recent study report published by the Market Research Future, the global market for Animal Feed is progressing rapidly and is expected to witness a healthy upsurge growth in the recent future, in terms of value and volume. Animal Feed will witness an exponential growth crossing its previous growth records by 2027 with a striking CAGR during the forecast period (2016 – 2027).

The global Animal Feed market is predominantly driven by growing populace worldwide. The growing population drives the demand for food in general and the demand for Food Animal such as Meat/Milk. In order to supply this growing demand of food animal; operators of these animal take

extreme care of their cattle / poultry. Food being the prime factor in the care factors chain; Animal feed market grows voluminously. Animal Feed if provided in optimum level gives good production of milk and meat. As a result of this global demand of nutrition rice dairy cattle feed is increasing. Additionally, Cost of metabolic diseases is increasing in Animal Feed (dairy cattle/ Goat/Swine etc.) which is one of the reason for driving global demand of Animal Feed. Simultaneously, Demand for milk products such as milk chocolate, milk powders, yogurts and others is growing its global market which in providing impetus to the Animal Feed market consecutively, growing the Animal Feed market.

However Concerns have arisen about the content of these Animal Feeds, as grain-based diets can produce serious and sometimes fatal digestive tract problems in food animals (animal products) such as cows, goats, and sheep whose stomachs are best suited to digesting high-cellulose containing plants like grass. In addition, recent studies have shown that chemical additives in feed may accumulate in animal tissues, potentially exposing consumers to unwanted chemicals such as

veterinary drug residues and heavy metals. It is important to consider how livestock feed affects animal health, and by extension the health of people who consume these animal products.
