## Description

Wiseguyreports.Com Adds “Penicillin and Streptomycin -Market Demand, Growth, Opportunities and Analysis of Top Key Player Forecast To 2022” To Its Research Database

The global Penicillin and Streptomycin market is estimated to grow at a CAGR of 0.5% from 2017-2022. Penicillin and streptomycin are two of the most widely prescribed antibiotics globally. These antibiotics are capable of preventing bacterial growth. According to a recent report by Orion Market Research, various factors responsible for market growth include increasing number of contagious diseases and heavy investments in research and development. Increasing demand for generic drugs is also adding to the market growth. The Penicillin and Streptomycin market has growth opportunities with innovations in new product development and usage of penicillin-streptomycin compound in cell culture as anti-bacterial agent. However, government regulations and patent expiry issues are major challenges to the growth of the market. Increasing incidences of anti-microbial resistance are also impeding the growth of the market. New antibiotics have been developed and used with lesser side effects compared to penicillin and streptomycin which has affected the market of penicillin and streptomycin. The market is segmented on the basis of product type (bulk and dosage), manufacturing process (synthetic process, natural process, semi-synthetic process and natural process) and route of administration (oral, intravenous and intramuscular). The end users include hospitals, clinics and others.
