Market Research Analysis:

The packaging type is the most important factor in food packaging, beverages, pharmaceutical and others. Polyethylene pouches, of all materials used for packaging, are the most commonly used material. The pouches are light weight and provide advantage of compact packaging for the purpose of logistics. The pouches are being extensively used for storing frozen food and even for packaging of the beverages. Therefore, growth in the concept of flexible packaging will directly influence the stick pouches packaging market.

Asia-Pacific region is expected to dominate the stick pouches packaging market with highest CAGR due to the rapidly changing lifestyle, increase in the disposable income, extensive growth in population, and the constantly growing packaged food industry. The increase in sale of incense sticks and adoption among people in the region is also contributing to the growth of the market.
