Description

Wiseguyreports.Com Adds “Disaster Recovery as a Service -Market Demand, Growth, Opportunities and Analysis of Top Key Player Forecast To 2022” To Its Research Database

The global disaster recovery as a service (DRAAS) market is anticipated to grow with the CAGR of 46% during 2017-2022. The major factors that are augmenting the growth of the market are estimated to be the increasing cloud as a services market and increasing enterprise IT spending across various applications. Furthermore, high adoption rate among SMEs, flexibility and automation capabilities and faster recovery and cost effective solutions are also estimated to be one of the major factors that are augmenting the growth of the market.

Increasing demand of a cloud as a service market is anticipated to augment the growth of the disaster recovery as a service market, as it is a vital segment of the cloud as a service market. The global cloud managed service market is valued to around \$35.5 billion in the year 2016 and it is further estimated to reach \$76.7 billion by the year 2021. Increasing ICT expenditure and increasing big data analytics market are the major factors driving the growth of the market. Furthermore, DRAAS offers various benefits over conventional disaster recovery solutions, which are estimated to augment the growth of the market. Major benefits of DRAAS includes; reduced cost, no maintenance cost, faster recovery, flexibility etc.

However, there are certain factors that are hindering the growth of the disaster recovery as a service market. Requirement of high network bandwidth, data safety and security issues and compatibility issues are estimated to be the major constraints in the growth of the market.
