The Center says, "What makes Louisiana unique is asbestos was used on almost every type of building in the state built prior to 1980. This includes commercial buildings and military installations along with refineries, and oil exploration facilities. Every imaginable type of construction worker in Louisiana could have had heavy to very heavy exposure to asbestos prior to 1980. These types of workers in Louisiana would have included:

“

Every imaginable type of construction worker in Louisiana could have had heavy to very heavy exposure to asbestos prior to 1980”
