

# Feeding System Market Analysis, Size, Share, Growth and Trends by Forecast 2017 – 2023

*Feeding System Market, By Offering (Hardware, Software, Services) by Product (Self-Propelled System, Rail Guided System) - Forecast 2023*

PUNE, MAHARASHTRA, INDIA, July 31, 2017 /EINPresswire.com/ -- Market Highlights:

Global Feeding System Market has tracked the major market events including product launches, technological developments, mergers & acquisitions, and the innovative business strategies opted by key market players. The increasing focus of major companies on technological advancements in the feeding management along with new product has launched that has marked the peak of market size of dairy farms across the globe.

Furthermore, the cost savings associated with the adoption of feeding systems are the factors expected to favor the growth of the feeding systems market during the forecast period.

DairyMaster (Ireland),  
Rovibec Agrisolutions Inc.  
(Canada), DeLaval Holding  
AB (Sweden)”

*Market Research Future*

The study indicates that the increasing use of automated and control devices, and sensing and monitoring devices, such as radio frequency identification, sensors, and global system positioning technologies in the livestock farming has turned up to be the progressive path in the hardware segment in the coming years. The increasing demand of the livestock farm owners towards automated feeding systems has led to the growth in the feeding management by the introduction of innovative products by the key players and rising demand for

dairy products across the globe. Along with strategically analyzing the key micro markets, the report also focuses on industry-specific drivers, restraints, opportunities and challenges in the Copper Strips market.

The global Feeding System market is expected to grow at USD 1,411.21 Million by 2023, at 8.6 % of CAGR between 2017 and 2023.

Major Key Players:

- Cormall AS (Denmark)
- GEA Group AG (Germany)

- Lely Holding S.A.R.L (Netherlands)
- Agrologic Ltd (Israel)
- DairyMaster (Ireland),
- Rovibec Agrisolutions Inc. (Canada)
- DeLaval Holding AB (Sweden)
- Trioliet B.V. (Netherlands)
- Cormall AS (Denmark)

#### Feeding System Market Segmentation:

The Feeding System Market has been segmented on the basis offering, product, analysis, end users and region. Looking through the end-user segment it has been observed that the feeding systems have proven extremely reliable and robust. Various solutions are tailored to meet the needs whether it be mounted in a feeding barge, at a hatchery or be installed as a complete package in the container solution. All the components are made in order to have a long life and our experiences are so good that it has given us the necessary confidence to offer the best guarantee on the market.

Taste the market data and market information presented through more than 30 market data tables and figures spread over 100 numbers of pages of the project report. Avail the in-depth table of content TOC & market synopsis on “Feeding System Market - Forecast to 2023”.

#### Market Research Analysis:

On geographic basis, Feeding System market is studied in different regions as North America, Europe, Asia-Pacific and Rest of world. It has been observed that North America region is leading with the highest growth rate in the Feeding System market as the reduced time and cost associated with feeding management are encouraging the livestock owners to adopt different types of feeding systems has boosted the growth & demand of Feeding System in this region. Europe is expected to show slower growth rate compared to other regions in the Feeding System market.

The developing economies in Asia-pacific regions like China, Japan, India and others are propelled to good growth in the Feeding System market.

#### Regional Analysis:

The regional analysis of Feeding System Market is being studied for region such as Asia pacific, North Americas, Europe and Rest of the World. The feeding systems have been used in Europe for many years, but the usage in the US has increased in recent years.

These systems allow for increased social facilitation among calves, redirection of labor from feeding to management of calves, consistency of milk delivery, and consumption of additional milk in smaller meals. Asia-Pacific region is contributing high with the growing demand of feeding system due to perceived benefits of the systems by dairy farmers considering adopting them need to be evaluated based on research and experiences by those using such systems.

#### Intended Audience:

- Feeding System device manufacturers
- Technology Providers of Feeding Systems
- Technical Universities
- Research Institutes and Organizations
- Component Suppliers
- Feeding Equipment Manufacturers
- Suppliers and Distributors of Feeding System
- Standardization and Testing Firms
- Livestock Research and Consulting Firms

- Manufacturers of Dairy Farm Equipment
- Safety equipment manufacturers
- Distributers
- Investors

#### About Market Research Future:

At Market Research Future (MRFR), we enable our customers to unravel the complexity of various industries through our Cooked Research Report (CRR), Half-Cooked Research Reports (HCRR), Raw Research Reports (3R), Continuous-Feed Research (CFR), and Market Research & Consulting Services.

MRFR team have supreme objective to provide the optimum quality market research and intelligence services to our clients. Our market research studies by products, services, technologies, applications, end users, and market players for global, regional, and country level market segments, enable our clients to see more, know more, and do more, which help to answer all their most important questions.
