

# Home Energy Systems Recognized as a Top Solar Contractor in San Diego

*The Solar Power World Top Solar Contractors list includes San Diego-based solar firm*

SAN DIEGO, CA, UNITED STATES, August 1, 2017 /EINPresswire.com/ -- Coming off the biggest year ever for U.S. solar installations, local installer [Home Energy Systems](#) is proud to be named one of the [top solar contractors](#) in the United States by [Solar Power World](#) magazine. Home Energy Systems achieved a rank of 314 out of 500 solar companies.

The Top Solar Contractors list is developed by Solar Power World to recognize the work completed by solar contractors across the United States. Produced annually, the Top Solar Contractors list celebrates the

achievements of U.S. solar developers, subcontractors, and installers within the utility, commercial and residential markets. The list was released on July 25.

“

It is an honor to be recognized as one of the top solar contractors in the United States”

*Ross Williams, Vice President of Home Energy Systems*

“The 2017 Top Solar Contractors list features 500 of the best solar contractors in the United States,” said Kelly Pickerel, managing editor of Solar Power World. “From solar hotbeds on the coasts to the up-and-coming Midwest solar market, every installer adding even the smallest solar array to the grid is making a positive impact on our communities. We’re proud to recognize these companies and their efforts to bring solar power to U.S. homes and businesses.”

The U.S. solar market installed more than 14,700 MW of solar in 2016, nearly doubling the capacity installed in 2015. For the first time ever, solar was ranked as the No. 1 source of new electric generating capacity additions brought online throughout the year. GTM Research and the Solar Energy Industries Association (SEIA) predict the cumulative U.S. solar market to nearly triple in size over the next five years. By 2022, more than 18 GW of solar photovoltaic capacity will be installed annually, and Home Energy Systems will continue to be a major player in adding solar to the grid.

Home Energy Systems employs 20 workers, who installed 1,350 kW of solar in 2016. Since its founding in 2001, the company has installed 6,960 kW of solar. The company is now a trusted solar

installer and the premier energy storage provider in San Diego County. Since our founding, our main focus was to share the financial and environmental benefits of solar renewable energy with not only residential clients, but also commercial clients.

“It is an honor to be recognized as one of the top solar contractors in the United States,” stated Ross Williams, Vice President of Home Energy Systems, “we work very hard to provide top tier customer service, installation and renewable energy products.”

Home Energy Systems installed a large commercial solar panel system on the YMCA in San Diego. Adding to their success this past year.
