*Pune, India, 01 Aug 2017: WiseGuyReports announced addition of new report, titled "Global Data Center Rack Market - Strategic Assessment and Forecast 2017-2022"*

PUNE, INDIA, August 1, 2017 /EINPresswire.com/

--

[A data center rack is](#) a kind of steel material and electronic system that is made for house servers, networks gadgets, links and other servers. This structure helps in keeping and arrangement of devices, and server in one place.

The data center must have good and promising security provision because they are designed as home base systems that can control entire business dealings. Most of the operators are spending a huge amount for the security of important and high-level data. Therefore operator has introduced new Rack-level security. This security provides an option like video monitoring and biometrics for the safety of each rack. With more security facilities in the rack, there would price war between local and global players. This will drive the data center rack market during predicted time.

According to research report, the data center rack market is expected to grow at a CAGR of more than 19% during 2016 – 2022 in terms of shipment.
