Natural Food & Drink

The lead analyst of the report said: "With fast technological developments it becomes easier to produce food with natural methods. Furthermore, natural production is cheaper than conventional methods with the use of synthetic additives. The rise of natural food is expected to occur in all the submarkets such as dairy products, meat, poultry, confectionary, soft drinks, and fruits & vegetables. The prepared food sector is also one of the fastest growing because this kind of food has longer shelf life and is easier to cook. Development of natural additives submarkets is expected to gain pace in the future because almost every synthetic ingredient can be replaced. A search for new natural additives, manufacturing of the new mixtures of natural additives, creation of new flavours and other R&D activities in the field of additives submarket is seen as one of the main targets for producers"

The 156 page report contains 106 tables, charts and graphs that add visual analysis in order to explain developing trends within the all natural food & drink market. Visiongain provides sales revenue forecasts for the period 2017-2027 for the 6 leading all natural food & drink submarkets, namely Flavours, Colours, Sweeteners, Preservative, Emulsifiers, Stabilizers, & Thickeners (EST) and Other Additives.
