

Nucleic Acid-based Therapeutics Market Overview, Growth, Share, Revenue and Forecast 2017-2022

Global Nucleic Acid-based Therapeutics Market by Technology (Anti-Sense and Anti-Gene), by Applications and by End Users - Forecast till 2022

PUNE, MAHARASHTRA, INDIA, August 9, 2017 /EINPresswire.com/ -- [Global Nucleic Acid Therapeutics market](http://GlobalNucleicAcidTherapeuticsmarket.com):

The global nucleic acid therapeutics market has been evaluated as a growing market and it is expected that the market will touch high growth figures in future.

The global nucleic acid therapeutics market is expected to grow with CAGR of

~6.5% during the forecast period. Collaboration is the most effective strategy and first comer advantage is huge. Also, research funding by healthcare organizations and governments to develop advanced products is further expected to impel the growth

Nucleic Acid-based Therapeutics Market Research Report- Global Forecast to 2022

Major key Players include Wave Life Sciences Ltd., Copernicus Therapeutics Inc., Imugene, Caperna, Phylogica, Protagonist Therapeutics, Benitec Biopharma,”

Market Research Future

Key Players for Global Nucleic Acid-based Therapeutics Market:

- Wave Life Sciences Ltd.,
- Copernicus Therapeutics Inc.,
- Imugene,
- Caperna,
- Phylogica,
- Protagonist Therapeutics,
- Benitec Biopharma,
- EGEN (Expression Genetics),
- Benitec Biopharma,
- BioMedica (Oxford BioMedica),

- Transgene
- others.

Market Highlights

Nucleic acid therapeutics are analogues or inhibitors of naturally occurring nucleic acids or proteins responsible for genetic expression. They are intended to inhibit the expression of faulty proteins or to increase the expression of deficient proteins causing diseases.

Traditional drug therapy has poor or no cure for genetic diseases such as thalassemia, sickle cell

anemia, hemophilia, cystic fibrosis, diabetes etc. Molecular target identification and genetic profiling forms the backbone of these class of drugs. The human genome project has also increased our understanding of the genetics. Nucleic acid medication have revolutionary potential as they target the genetic basis of diseases and can have permanent cure.

The market driving factors are the recent developments in genetics, the increasing economic and technological investments in research and development, poor cure rates for genetic diseases with traditional drugs, rising power of software's to mimic the human molecular entities such as receptors etc.

Taste the market data and market information presented through more than 50 market data tables and figures spread in 110 numbers of pages of the project report. Avail the in-depth table of content TOC & market synopsis on "[Nucleic Acid-based Therapeutics Market Research Report- Global Forecast to 2022](#)"

The Hottest Trend in the Market

Nucleic medicines are targeted therapies designed to act on the molecular level. They are intended to correct for either the expression of a proteins causing disease or to correct for decreased protein expression in diseases.

The market for nucleic acid therapeutics is being driven by factors such as the intense expectation about their revolutionary potential, the potential extreme return on investment that can accrue, lack of effective treatment for genetic disorders with convectional drug therapy etc.

However, the market constraints are also serious which has limited the market. The technical barriers include lack of understanding of genetics and the extreme high development and time costs coupled with poor rates of success in developing newer nucleic acid drugs. The social barriers include issues of genetic contamination and other taboos associated with gene transfer. The regulatory hurdles are also strong and include issues of safety and ownership arising from genetic material.

Segmentation:

Global nucleic acid therapeutics market has been segmented

On the basis of technology which comprises anti-sense and anti-gene, short inhibitory sequences, gene transfer therapy, nucleoside analogs, ribozymes, aptamers and others.

On the basis of applications; market is segmented into monogenetic disorders which is further sub segmented into thalassemia, sickle cell anemia, hemophilia, cystic fibrosis etc. and multi-genetic disorders which is sub segmented into cancer, diabetes, neurodegenerative diseases, cardiovascular diseases etc.

On the basis of end users; market is segmented into hospitals, academic & research institutes.

Table of Content

- 1 Introduction
 - 1.1 Definition
 - 1.2 Scope Of Study
 - 1.3 Research Objective
 - 1.4 Assumptions & Limitations
 - 1.5 Market Structure:
- 2 Research Methodology
 - 2.1 Research Process
 - 2.2 Primary Research
 - 2.3 Secondary Research

- 3 Market Dynamics
 - 3.1 Drivers
 - 3.2 Restraints
 - 3.3 Opportunities
 - 3.4 Challenges
 - 3.5 Macroeconomic Indicators
 - 4 Market Factor Analysis
 - 4.1 Porter's Five Forces Model
 - 4.1.1 Bargaining Power Of Suppliers
 - 4.1.2 Bargaining Power Of Customer
 - 4.1.3 Intensity Of Competitor's
 - 4.1.4 Threat Of New Entrants
 - 5 Global Nucleic Acid-Based Therapeutics Market, By Technology
 - 5.1 Introduction
 - 5.1.1 Anti-Sense And Anti-Gene
 - 5.1.2 Short Inhibitory Sequences
 - 5.1.3 Gene Transfer Therapy
 - 5.1.4 Nucleoside Analogs
 - 5.1.5 Ribozymes
 - 5.1.6 Aptamers
 - 5.1.7 Others
 - 6 Global Nucleic Acid-Based Therapeutics Market, By Applications
- Continue.....

About Market Research Future:

At Market Research Future (MRFR), we enable our customers to unravel the complexity of various industries through our Cooked Research Report (CRR), Half-Cooked Research Reports (HCRR), Raw Research Reports (3R), Continuous-Feed Research (CFR), and Market Research & Consulting Services.

MRFR team have supreme objective to provide the optimum quality market research and intelligence services to our clients. Our market research studies by products, services, technologies, applications, end users, and market players for global, regional, and country level market segments, enable our clients to see more, know more, and do more, which help to answer all their most important questions.
