

Cyber Insurance 2017 Global Market Size, Status, Analysis and Forecast to 2022

WiseGuyReports.Com Publish a New Market Research Report On - "Cyber Insurance 2017 Global Market Size,Status,Analysis and Forecast to 2022".

PUNE, INDIA, August 9, 2017 /EINPresswire.com/

Cyber-insurance is an insurance product used to protect businesses and individual users from Internet-based risks, and more generally from risks relating to information technology infrastructure and activities. Risks of this nature are typically excluded from traditional commercial general liability policies or at least are not specifically defined in traditional insurance products. Coverage provided by cyber-insurance policies may include first-party coverage against losses such as data destruction, extortion, theft, hacking, and denial of service attacks; liability coverage indemnifying companies for losses to others caused, for example, by errors and omissions, failure to safeguard data, or defamation; and other benefits including regular

security-audit, post-incident public relations and investigative expenses, and criminal reward funds.
