Summary

[Seed Coating Materials](#) market is expected to grow from \$1.30 billion in 2016 to reach \$2.21 billion by 2023 with a CAGR of 9.2%. Huge demand for food due to the growing population and increasing technological innovation in the agriculture are some of the key factors driving the market growth. On the other hand, strict government rules and complexity in discarding of treated seeds are the factors hampering the market.

Cereals and grains segment commanded the largest market share owing to high consumption of cereal and grains across the globe. In reprocation to that of revenue, North America is anticipated to be leading market in seed coating material market followed by Europe. Growing demand of packaged food and beverages with health benefits is anticipated to sustain the demand for market among food products across the region.
