## Summary

Global [Directed Energy Weapons \(DEW\)](#) market is expected to grow from \$8.12 billion in 2016 to reach \$41.97 billion by 2023 with a CAGR of 26.4%. Rising demand for non-lethal deterrents and growing demand for the use of naval weapons in naval forces across the world are some of the major factors favoring the market growth. On the other hand huge development costs, strict industry regulations and lack of testing facilities are restricting the market growth.

Based on product type, lethal weapons segment has observed highest growth rate as these weapons are commonly used by police, military and defence. By high energy laser systems, fiber laser segment leads the market globally and the growth of this segment is attributed to the rising demand for laser technologies and microwave-based weapons. Asia Pacific is expected to witness huge growth rate and the growth of this region is owed to the use of directed energy weapons.
