[Global LED Traffic Signs and Signals Market](#)

Description

Traffic signs and signals are a vital component for road safety management. They are used to maintain safety on road for pedestrians as well as drivers. They are usually erected on the sides of road with information for commuters. With the traffic volume increasing globally, countries have simplified and standardized their signs and signals to overcome language barriers and enhance safety. However, the placement of traffic signs and signals can vary to a considerable extent from country to country.

Covered in this report

The report covers the present scenario and the growth prospects of the global LED traffic signs and signals market for 2017-2021. To calculate the market size, the report considers new installations, volume and retrofit/replacement market.
