Key manufactures of juice concentrate products are focusing in creating healthy product portfolio with the help of their R&D

department. Maximum competitors in the juice concentrate production market are using cold press or pasteurization for increasing the shelf life.

Market Overview

Juice concentrate is light on stomach and good for digestion as it is enriched with some of the most essential nutrients and minerals that our body needs. Due to hectic work schedules that working class goes through every day, they are unable to take proper nutrient regularly and their body lacks these as well as antioxidants that helps in treating various heart, skin, hair and other health related problems. The demand for juice concentrate is expected to increase tremendously in the coming years especially in developed countries where juice concentrate is becoming an important part of regular diet. Juice concentrate is mainly available in liquid, powdered and frozen form so that conveniently suits numerous consumers' requirement. R&D, innovative product line, improvement in the packaging technology are some of the latest methods followed by key manufacturers which has

been driving the market growth in recent years.
