#### Regional analysis

Globally North America has the largest share in the sleep apnea devices market. The share of this nation in this market is mainly due to increasing innovations in healthcare technology and sleep apnea devices. For example GE Healthcare propelled its new MARS Virtual Sleep Lab (VSL), the first device that permits doctors to see cardiac and sleep apnea examination from any GE-monitored inpatient bed. MARS Virtual Sleep Lab, which is controlled by the WideMed's Morpheus Hx rest apnea analysis program, empowers OSA diagnosis directly from the hospital bed, transforming in-patient rooms into virtual sleep labs and empowering a bedside diagnosis with the use of monitored data to give diagnostic information.
