

Allied Power Group Proudly Announces Director of Business Development and Plant Services

HOUSTON, TEXAS, UNITED STATES , August 21, 2017 /EINPresswire.com/ -- Allied Power Group (“Allied”) is pleased to announce the addition of Mr. Marty Magby to the organization as the Director of Business Development and Plant Services. Mr. Magby is a graduate of Kansas State University with a B.S. in Engineering. Over his 25-year career in the turbine industry Marty has worked for

Siemens/ Westinghouse as a Field Service Engineer to include increasing responsibility over his 10-year tenure with that organization. At the time of his departure from Siemens/Westinghouse in 2002, Marty was the Operations Manager for the 501F fleet with the Combustion Turbine Specialty Services Group (CTSS). After CTSS, Marty developed and managed multiple third-party non-OEM initiatives as a supplier of steam and gas turbine field service for TGM/GTM. Since 2006 Marty has managed Westar Energy’s fleet of 21 Heavy Frame and Aero derivative turbines.

As Director of Business Development and Plant Services for Allied, Marty will be responsible for the companies bundled solutions and services activities to include Field Services, New Manufactured Capital Components and Component Repairs focusing on the North America market sector.

Marty is an active participant in the combustion turbine users groups including his most recent role in the CTOTF group as the Senior Chair of the GE Large Frame that included the Frame 5, 6, 7EA, 7FA, and Alstom round tables.

Dave Theis, President of Allied Power Group, “At Allied, we strive to hire the absolute best people in the industry and Marty brings so much to the organization that we are excited to bring him on board and watch him use his knowledge and experience to grow our customer base, capabilities, and support our overall business development endeavors.”

About Allied

Allied Power Group is a growing independent provider of critical components and services to its customers in the power generation, refining, pipeline and general industrial sectors. Allied’s fully-integrated suite of Industrial Gas Turbine products and services include engineered inspections and repairs, specialized coatings, precision manufacturing of replacement components, experienced field service professionals, multi-faceted rotor repair and an expansive inventory of refurbished parts. The Allied team is comprised of seasoned industry veterans with expertise in engineering and access to the latest technology which allow it to provide its customers with innovative and flexible solutions. Allied’s mission is to consistently partner with its customers to provide targeted engineered solutions that maximize asset readiness and reliability, while alleviating unnecessary risk.
