

5G For FWA (Fixed Wireless Access) Market is Expected to Grow \$40 Billion By 2025 - Report Bazaar

Commonly referred to as FWA, Fixed Wireless Access has emerged as one of the most predominant use cases for early 5G network rollouts.

NEW YORK, NEW YORK, UNITED STATES, August 24, 2017

/EINPresswire.com/ -- Commonly referred to as FWA, Fixed Wireless

Access has emerged as one of the most predominant use cases for early 5G network rollouts. Multiple mobile operators and service providers are initially seeking to capitalize on 5G as a fixed wireless alternative to deliver last-mile connectivity – at multi-hundred Megabit and Gigabit speeds – in areas with insufficient fiber holdings.

The very first standardized deployments of 5G-based FWA are expected to be commercialized as early as 2019. Largely driven by early commercial rollouts by Verizon Communications and AT&T in the United States, 5G-based FWA subscriptions are expected to account for \$1 Billion in service revenue by the end of 2019 alone. The market is further expected to grow at a CAGR of approximately 84% between 2019 and 2025, eventually accounting for more than \$40 Billion.
