“

This is a great forum, it's easy to listen to, and many of the topics on the show translate to our personal lives as well. I'm looking forward to the opportunity to share ideas with Dr. Wallace.”

Angie O'Donnell

The premise of "Out of the Comfort Zone" is that there is no growth in comfort and no comfort in growth. Business today typically values and promotes leaders for their subject expertise. Leaders who have command of the details and execute based on knowledge and experience are highly respected. To grow as a leader it is necessary to "get out of the comfort zone," which means learning to lead without just being the expert.

“This is a great forum, it's conversational and easy to listen to, and many of the topics on the show translate to our personal lives as well, I'm looking forward to the opportunity to share

ideas with Dr. Wallace next month.”
